

CONTACT INFORMATION	Petuum, Inc. 2555 Smallman Street, Suite 120, Pittsburgh, Pennsylvania 15222	Mobile: 215-696-0238 Email: gpengzhi@gmail.com Homepage: https://gpengzhi.github.io
EDUCATION	Rensselaer Polytechnic Institute , Troy, NY Ph.D., Electrical Engineering, August 2013 - December 2017 <ul style="list-style-type: none">• Advisor: Professor Meng Wang• Thesis: High-dimensional Data Analysis by Exploiting Low-dimensional Models with Applications in Synchrophasor Data Analysis in Power Systems University of Pennsylvania , Philadelphia, PA M.S., Electrical Engineering, August 2011 - May 2013 Xidian University , China B.S. (with honors), Electronic and Information Engineering, August 2007 - May 2011	
WORK EXPERIENCE	Data Scientist February 2018 to present Core Machine Learning Team, Petuum, Inc. Supervisor: Dr. Tong Wen and Zhiting Hu <ul style="list-style-type: none">• Designed and implemented the machine learning library (based on TensorFlow, DyNet, and LightGBM) for Petuum AI Builder Platform.• Designed and developed Texar-PyTorch (https://github.com/asym1/texar-pytorch, gaining over 520 stars), an open-source machine learning and text generation toolkit based on PyTorch.• Designed and developed Forte (https://github.com/asym1/forte), a flexible composable system designed for text processing, providing integrated architecture support for a wide spectrum of tasks, from Information Retrieval to tasks in Natural Language Processing (including text analysis and language generation).• Maintained and contributed to Texar-TensorFlow (https://github.com/asym1/texar, gaining over 1820 stars), an open-source machine learning and text generation toolkit based on TensorFlow. Research Intern December 2010 to May 2011 Internet Media Group, Microsoft Research Asia Supervisor: Dr. Feng Wu and Dr. Chong Luo <ul style="list-style-type: none">• Analyzed the data collected from 54 sensors deployed in Intel Berkeley Research Lab (150 MB of data) to exploit the temporal correlations in sensor readings. Developed a joint source network coding scheme for approximate data gathering in wireless sensor network.	
SKILL SETS	<ul style="list-style-type: none">• Proficiency with MATLAB, Python, Dynet, PyTorch, and TensorFlow• Experienced in Java, R, C/C++, C#, AMPL	
HONORS AND AWARDS	<ul style="list-style-type: none">• North America Finalist of IBM Watson Build Challenge 2017• Paper selected as the runner-up of the Best Paper in Electric Energy Systems Track of Hawaii International Conference on System Sciences 2015• Founders Award of Excellence (top 1%) 2015• Paper selected as one of the Best Conference Papers on Power System Analysis and Modeling of IEEE Power & Energy Society General Meeting 2014• Excellent Graduate of Xidian University (top 1%) 2011• National Scholarship (top 1%) 2010	

- First prize of the College Academic and Technological Scholarship (top 2%) 2008-2010
- Excellent Student Awards (top 1%) 2008

RESEARCH EXPERIENCE

Research Assistant

August 2013 to December 2017

ECSE Department,
Rensselaer Polytechnic Institute
Supervisor: Professor Meng Wang

- Analyzed the Phasor Measurement Unit (PMU) data (> 200 MB of data) to exploit the temporal and spatial correlations (low dimensionality) of the data.
- Proposed an identification method that can detect the cyber data attack in the power system. Tested our method on the actual PMU data from Central New York Power System.
- Developed an on-line algorithm to estimate the missing PMU data in real time manner. Built the corresponding action adapter in OpenPDC by C# code, reducing the computational time by 50%.
- Proposed a novel model to characterize the practical nonlinear datasets. Developed convex-optimization-based methods to recover missing data under this model. Tested our method on simulated power system data in IEEE 39-bus New England Power System.
- Proposed a novel method to recover the original data from quantized measurements even when partial measurements are corrupted. Developed a projected gradient method to solve the non-convex problem approximately. Tested our method on actual PMU data from Central New York Power System.

Research Assistant

May 2012 to May 2013

Department of Bioengineering,
University of Pennsylvania
Supervisor: Professor Gershon Buchsbaum

- Analyzed the EEG data from IIEG Portal for epilepsy detection.
- Proposed a new dictionary for EEG dataset. Improved the reconstruction performance of the EEG data by 20%.

PROFESSIONAL ACTIVITIES & SERVICE

- Student Member of IEEE, 2013 - 2017. Member of IEEE, 2018 - present.
- RPI Student Representative at the Center for Ultra-wide-area Resilient Electric Energy Transmission Networks (CURENT), 2015 - 2016.
- Teaching Assistant (Rensselaer Polytechnic Institute):
Modeling and Analysis of Uncertainty, Fall 2017,
Distributed Systems and Sensor Networks, Fall 2017.
- Program Committee Member:
Conference on Uncertainty in Artificial Intelligence (UAI) 2018.
- Reviewer:
IEEE Transactions on Smart Grid,
IEEE Transactions on Automatic Control,
IEEE/ACM Transactions on Networking,
IEEE Signal Processing Letters,

Annals of Mathematics and Artificial Intelligence,
American Control Conference,
IEEE International Conference on Communications, Control, and Computing Technologies
for Smart Grids (SmartGridComm),
International Symposium on Antennas and Propagation.
